

Power Investigator

The TigerStop Power Investigator is a tool that will measure and log incoming power to the TigerStop. TigerStop Technicians can then examine the data to determine if there are incoming power spikes/sags.

Parts List

- Power Investigator (PI)
- 110vac power cable

Installation

1. Find a power outlet that is on the same circuit as the TigerStop.
2. Plug the power cord into this outlet.
3. Plug the other end of the power cord into the PI.
4. Leave the PI in an area where it will not be disturbed for at least 72 hours.
5. After the allotted time, unplug the PI power cord and send the unit back to;

TigerStop, LLC
12909 NE 95th St
Vancouver WA, 98682

After the PI has been returned, allow one week for TigerStop to download and analyze the data.
